

Balcony Carpets

Please take note that all balcony carpets which are loosely laid (not glued down) should be lifted and stored for the winter months.

All other non-permanent installation (such as rubber tiles or other flooring materials which are not glued down) should also be lifted for the winter.

Arrangements may be made with the Superintendent's office for assistance with lifting your carpet as with transporting it to a common storage area, which has been designated for this use.

For additional information, please do not hesitate to contact the Property Manager during on-site office hours.
